Founded in 1851, Haseler and Restall Ltd. are one of Britain's few long-established specialists in pewter.

And to be experienced and a specialist in this historic metal is important.

Because it means that the pewter is worked with years of care and understanding. And that the end result is a beautifully designed, superb quality product that we are proud to produce and, we believe, you will be proud to sell.

For example, Tudric Pewter is spun from rolled metal and the fittings are cast by hand, so the range is strong, easy to handle and has a satisfying quality about it.

It is completely lead-free, and conforms to B.S.5140 and is therefore acceptable to health authorities internationally.

Tudric Pewter comes in a range of handsome traditional and elegant new modern designs that represent the best in pewterware available. There are many more to choose from, as our lists show - and all made to the same high standard.

May we suggest that you select with care. After all, ever since the Greeks and Romans people have been choosing pewterware.

Perhaps, it must be admitted, not made with the same care, experience and attention to detail as the Haseler and Restall range.

But pewterware nevertheless.
